

## UniCamillus *International Medical University in Rome*

Unicamillus – International University of Medical Sciences – is a private University in Rome recognized in 2018 by the Ministry of University and Research exclusively dedicated to Health and Medical Sciences. The University has an international vocation, being addressed to Italian, EU and non-EU students who look at the medical profession and Medicine with a global approach and intends to prepare excellent healthcare workers who show a scientific interest in in pathologies and health issues affecting especially the developing countries, such as Tbc and Aids.

The mission of the University is inspired by Camillus De Lellis: at the end of the 16th century he contributed substantially to defining criteria and organization of an efficient healthcare system, by drawing up and implementing the first modern procedure of hospital care, establishing the basic principles of respect and dignity of the patient. UniCamillus graduates will always bear in mind the humanitarian values acquired during the course of studies, especially the dignity of the patient, considered as a human being with his own sensitivity.

### **THREE-YEAR DEGREE COURSE IN RADIOLOGY, DIAGNOSTIC IMAGING AND RADIOTHERAPY TECHNIQUES**

taught in English

The educational offer also includes First and Second level Masters and Professional Courses delivered both in presence and e-learning mode in collaboration with Italian medical centres of excellence.

## **Internship**

During the degree courses, the students will have the opportunity to experience their future profession by carrying out internships in facilities identified by the degree course council and in the defined periods.

In agreement with the Regione Lazio, UniCamillus chose ASL Roma 6 as the reference hospital for students internships, which includes suitable hospital facilities for the implementation of the integration between assistance, teaching and research, including the Ospedale dei Castelli. Following the updating of the Memorandum of Understanding with the Regione Lazio published in the BUR n.104 suppl.2 of 27 December 2019, the San Giovanni Addolorata, San Camillo-Forlanini, Sant'Eugenio, Pertini and CTO Hospitals were added, thus creating an extraordinary training network for practical exercises available to the University.

In particular, students can benefit from tutoring and counseling activities for the study opportunities abroad, professional opportunities and continuation of university career. These activities take advantage of qualified external contributions for the psychological support and the promotion of relations and opportunities in the job market.

## **Admission**

In order to access the Unicamillus degree courses it is necessary to pass the admission test or apply for transfer to years following the first from other universities, both public and private, Italian and international, based on the remaining empty slots available. The number of slots available is determined annually by the Ministry of University and Research, in consultation with the Ministry of Health.

Each year the Calls for Application for each Degree Course are published on the official website with all the relevant information on the admission procedures.

## **Annual tuition fees**

The annual tuition fees for EU and equiparated students enrolled for the first time for a.y. 2021-2022 are set at a fixed amount; partial scholarships are made available and awarded on merit and income criteria for students enrolled to the Medicine and Surgery and the Dentistry and Dental Prosthetic Degree Courses. For non-EU students the contributions are fixed. UniCamillus provides a significant number of full or partial scholarships for deserving and highly motivated non-EU students who do not have sufficient financial resources. More specifically, the formula in use for the full scholarship is the "loan of honour", that is completely repaid if, after having achieved the degree, the professional returns to his own country (or in a similar one, agreed on with the university) to practice for at least three years.
