ADVANCED IMPLANTOLOGY MASTER

AY 2022/2023

SECOND LEVEL MASTER

OBJECTIVE

The Master has a theoretical-practical approach aimed at providing a learning on the problems of the surgical and rehabilitation prosthetic phases supporting the implant in cases with bone atrophy.

The teachings that are carried out within Istituto Stomatologico Toscano, aim to provide basic theoretical and methodological knowledge and consist of lectures and practical laboratory activities

CAREER OPPORTUNITIES

Those who will obtain the 2nd level Master in Advanced Implantology will be able, independently of the laws in force in the various countries, to carry out their professional activity autonomously at private health facilities, in a dependent or free professional regime.

TEACHING METHOD

The teaching methodology will have a theoretical-practical approach aimed at providing a learning on the problems of the surgical and rehabilitative prosthetic phases to the implant support.
