The SAINT CAMILLUS INTERNATIONAL UNIVERSITY OF HEALTH SCIENCES – UNICAMILLUS

**in partnership with
Istituto Stomatologico Toscano**

is running a CPD second-level course entitled

**Surgery in Implant Dentistry (MoSID)
(Academic year 2023/2024)**

Title	Surgery in Implant Dentistry	
Objectives	<p>The CPD course is designed for the general dentist who has already taken the first step into the field of implantology.</p> <p>The course is intended for dentists who wish to develop their theoretical knowledge and practical clinical experience of treatment planning and maintenance of dental implants. The CPD's programme aims to provide general practitioners with the confidence to select patients, diagnose, treat and perform implant cases. The CPD's programme will provide an understanding of the biological basis of implantology, provide clinical training through practical trials that will enable dentists to safely perform surgical procedures and design and perform maintenance of patients with dental implants. The didactic mode of the CPD's programme is blended: the programme combines theoretical webinar and classroom practice. It takes into account your time constraints and work responsibilities and is designed for those who would find it difficult to travel to the CPD's premises. The CPD course allows you to recreate the dynamics of a real classroom by following the theoretical part of the programme through live lessons. The total number of CPD sessions is 5. Online lectures will be recorded and can be reviewed for further study.</p> <p>Graduates will be able to independently plan and implement therapy concepts for the treatment of patients requiring dental implant prostheses. The course concludes with a Course's thesis on implantology topics that will prepare the student during the year and discuss at the end of the course</p> <p>The official language of the CPD course will be English</p>	
Course structure and methodology	<p>The Course program lasts 12 months and includes a total time of 1.500 hours, divided into:</p> <ul style="list-style-type: none"> •practical activity and lectures and seminars; •internship (300 hours); •study and individual preparation activities including the preparation of the final exam.
