# CLINICAL PERIODONTOLOGY- MASTER

## AY 2021/2022

## SECOND LEVEL MASTER SCIENCE

### OBJECTIVE

The periodontology is the specialty of dentistry that studies hard and soft tissues supporting teeth, as well as diseases and conditions that affect them.

The clinical periodontology studies the diagnosis, the prognosis and the treatment of all kind of inflammatory pathology affecting the periodontium, which includes the gingiva (gums), alveolar bone, cementum, and the periodontal ligament. The aim of this Master program is to improve the knowledge of clinical periodontology in dentists who want to study in deep this subject performing diagnosis, prognosis and treatment according to the evidence base dentistry and the clinical experience of tutors.

### CAREER OPPORTUNITIES

The aim of this Master program is to improve the knowledge of clinical periodontology in dentists who want to study in deep this subject performing diagnosis, prognosis and treatment according to the evidence base dentistry and the clinical experience of tutors

### TEACHING METHOD

Theoretical and practical sessions will be integrated by practical session on artificial and animal models.

The clinical surgery session would be performed during the course according to the calendar of practical lessons.

The calendar of the lessons could be modified and adjusted, with adequate notice, due to the national and international scientific calendar.

### MAIN SPEAKERS

- Ugo Covani : Professore Ordinario f.r. di Malattie odontostomatologiche dell'Università di Pisa
