TRAINING OBJECTIVES
To provide practical theoretical learning on the problems of surgical and prosthetic rehabilitation phases in implant support.

CAREER OPPORTUNITIES
Those who will obtain the 2nd level Master in Oral SURGERY & Implantology will be able, independently of the laws in force in the various countries, to carry out their professional activity autonomously at private health facilities, in a dependent or free professional regime.

TEACHING METHOD
Theoretical and practical sessions will be integrated by practical session on artificial and animal models. The clinical surgery session would be performed during the course according to the calendar of practical lessons. The calendar of the lessons could be modified and adjusted, with adequate notice, due to the national and international scientific calendar.
